***Reason for allowance***

The following is an examiner's statement of reasons for allowance: the applicant's amendment of 12-27-04 overcomes the technical deficiencies and the prior art of records.

The prior art of records fails to teach or fairly suggest a driver circuit connected to a supply voltage for driving a line in a network comprising: first driving means for driving the line comprising a plurality of current sources arranged in a bridge configuration, second driving means for driving a line, at least one control signal for selecting between the first and second driving means, a plurality of terminating elements coupled to an output of the driver circuit, wherein the first and second driving means are operated to limit a voltage at the output to about one-half of the supply voltage as called for in claims 1 and 11; a driver circuit for driving lines in a network comprising: a plurality of current sources connected in a bridge configuration as a bridge current driver, a voltage source coupled to said lines to provide a voltage driver, a plurality of terminating elements, supply voltages coupled to the bridge current driver and the voltage driver including a mid-point termination voltage, at least one control signal for selecting between the bridge current driver and the voltage driver as called for in claim 8; and a method for providing multi-mode driver capability of the circuit of claim 1 as called for in claim 21. Therefore, claims 1-3, 7-11, 14, 15 and 19-21 are presently allowed.

***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
